Special Correspondence of the Alexa. Guzette WASHINGTON, D. C., May 25, 1881. The belief seems to be gaining ground here that there will be three tickets in the field at next fall's elic ion in Virginia. The straightout republicaes, it is said, will ran a ticket ir respective of the possible opposition to such a course on the part of the Administration. There is great doubt as to the policy the President really interds adopting in the c.se, some asserting that he wil support Mahone as the only way by which to defeat the decreacy in Virginia, and thus make the vote of that State partially offset the less of New York; others on the contrary saying that any coalition with repudiationists will do infinitely more harm to the prr.y in the North than any possible good it may effect in the South. Geteral Mabore is still here and will remain until about the end of the week. He is by to means saguine of receiving the federal patrenage, but to strangers says he will sueseed in Virginia without it. The consultation we had with his licutenants yesterday terminated without any definite conclusion, to be recewed in Richmond the day before the meeting of their convention on Thursday next. Among these at the Arlington Hotel this morning waiting to toe General Mahone were Judge A. W. Chilton, D. A. Wirdsor, F. R. Windsor and Charles Dearborn, of Alexandria. Collector Brady, of Petersburg, and several other Mahonites were also there. They waited a long time for the General, who was visiting his friend, Bob Ingersoll, but were finally rewarded by a short interview. Mr. Brady when informed by the Gazatte correspendent that he had heard that Mahone had espeured the President, smilingly replied that the Gazetto's correspondent had a nack of hear ing many true things. Some of the other callers also said that they now had things as they wanted them. But for all this the Gene ral didn't look happy, and had no reason to look so, as the President told a friend to day that his policy regarding Virginia politics was to do all that is possible to strengthen republicanism in that State, and with Mr. Wise's idea of Vir-ginian republicanism in their minds, no selfrespecting rapublican believes that the success of Mr. Wise's friend, Mahone, will be of any real advantage to the Virginia republicans. The idea most prevelent about the President's course towards Mahone is that while he will not break with him, he will not render him any assistance, for the reason that it Conkling and Plait are returned to the Senate, as is now probable, he will want democratic support in that body, and that such support will be impossible it he assists Mahone. The differences among the Mahonites about their candidate for Governor are increasing, the aspirants now being Massey, Cameron, Riddleberger and

The reinstatement of Mr. Gover yesterday as postmaster at Waterford is considered here as indicative of a recent change of mind on the part of the Administration with regard to Gen. Mahone, as alr. Gover is a straightout republioan, and the gan who was put in his place, but whom he has now deposed, is a Mahene demoerat. The confirmation of Mr. Gray as colicepointment, is said now to have been no tush thing, and that, to the contrary, the withdrawal of his nomination was asked for by Mahone because he is not a readjuster, and the nomination of a Mahonite in his place. With regard to Mr. Grey, it is reported that Mr. Pearson, who was a candidate for Mr. Botts' place as internal revenue collector for the Alexandria district, will be his deputy, taking Mr. Corbott's place. Mr. Botts' friends have been assured position.

PROFESSIONAL CAMPS. A CARD—It should be generally known that persons so unfortunate as to lose one or more of their teath need not wait weeks and months for artificial substitutes and endure inconvonience, disagreeably changes in voice, facial expression. &c., but may have artificial teeth made before and inserted immediately after extraction of their natural teeth. By this mode a better adaptation, a more pleasant expression and a nearer approach toward preserving the natural harmony of the features are secured, and very much of the pain and difficulty experienced in learning to use teeth are also avoided. I have practiced this mode auccessfully for seven years, and having introduced it here, for seven years, and having introduced it here, would be glad to refer any one interested to patients who know of it from experience. In treating the natural teeth my object is to preserve every one that time, patience and modern methods of treatment can be seen to be a seen of the content treatment can save. The use of average in destroying exposed nerves is condemned by the more enlightened of the deatst profession on account of its turning touth dark, inducing abscess and finally the loss of the touth. The nerve pulp, which is the source of life to the touth, should always be treated, when exposed, with a giant of the source of the source.

should always be treated, when exposed, with a view to its restoration to health. I use no cheap alloys for filling; my fees are macrical than accusually charged for the same class of work. Gold filling-from \$1.50 up; other work at proportionately low rates.
